SUMMARY

Product Manager and Product Owner with 5+ years leading B2B SaaS, mobile, and internal-platform products across Nepal- and Australia-based teams, from discovery through GTM. Builds KPI frameworks (activation, retention, NPS, churn) and runs structured experimentation, A/B tests, funnel and cohort analysis, to turn continuous discovery into shipped features. Applies AI tools to specific, repeatable steps of the product workflow: synthesising weekly discovery calls, drafting first-pass PRDs and user stories, and rapid-prototyping flows; cutting PRD turnaround time and freeing time for customer-facing discovery.

CORE COMPETENCIES

Product Strategy & Discovery

Roadmapping, MVP definition, continuous discovery (Marty Cagan framework), customer interviews, prototype testing, product-led growth (PLG), feature prioritisation (RICE/WSJF).

Quality Control & Analytics

A/B test design and readout, KPI framework design (activation, retention, NPS, churn), funnel and cohort analysis, Power BI and Looker Studio dashboarding for weekly product-health reporting.

Product Documentation

PRDs, user stories and acceptance criteria, release notes, roadmap decks, and stakeholder briefs; first drafts accelerated with AI, refined and owned end-to-end by me.

Delivery & Execution

Agile & Scrum, sprint planning and reviews, release planning, Definition of Ready/Done, risk and quality management, resource planning, cross-functional team leadership.

Commercial & GTM

Pricing and packaging input for B2B SaaS module tiering, go-to-market support, stakeholder alignment across Sales, Customer Success and Engineering.

Tools

Jira, Confluence, Trello, ClickUp, Monday, Slack, Zoom, MS Office, Figma, Adobe XD, Sketch, Blender.

AI & Product Productivity Tools

Claude / ChatGPT Team (PRD and user-story drafting, sentiment synthesis), Otter.ai (discovery-call transcription and synthesis), v0 / Lovable (rapid UI prototyping).

WORK EXPERIENCE

Product Owner, *Work For Impact Ltd (Remote)* May 2025 – Present

Outcome focus: Activation, retention and operational efficiency for internal platforms

- Own 5 internal product platforms end-to-end: discovery, planning, delivery and post-release optimisation; as sole Product Owner for a cross-functional team of engineers and designers.
- Redesigned core navigation after reviewing session analytics and funnel data, **reducing onboarding drop-off by 30%** and lifting weekly feature adoption over the following release cycle.
- Translated stakeholder and support-ticket feedback into user stories and acceptance criteria, keeping a prioritised backlog groomed roughly two sprints ahead of delivery.
- Partnered with engineering, design and customer support to redesign onboarding flows, improving usability scores captured in post-release user surveys.
- Introduced a lightweight delivery playbook (Definition of Ready/Done, sprint health checklist), **cutting average issue-resolution time by 10% and lifting team throughput by 23%** measured over two quarters.
- Built a product status dashboard tracking activation, retention, and support-ticket volume, giving leadership weekly visibility into product health.

Product Manager / Product Owner, Bajra Technologies Pvt. Ltd.**Oct 2021 – Apr 2025****Outcome focus:** *Account revenue expansion and delivery predictability for enterprise B2B SaaS*

- Owned two enterprise-level B2B SaaS modules end-to-end, leading two cross-functional squads (engineering, design, QA) through full product lifecycles.
- Ran continuous discovery: weekly customer interviews and usability tests to validate high-impact features; the resulting feature set **contributed to a 30% expansion in account revenue over roughly 18 months**.
- Provided pricing and packaging input to Sales and Finance for module tiering, supporting the account-revenue growth above.
- Acted as PMO co-lead, introducing structured prioritisation (impact/effort scoring) and delivery governance that helped **increase shipped project revenue by 70% year-over-year**.
- Created an organization-wide Dashboard using Looker Studio to track and maintain project health, team satisfaction, client reviews, and delivery across the entire organization.
- Defined delivery standards, workflows and release governance (release checklist, RAID log) that reduced unplanned downtime and improved release predictability across both modules.
- Facilitated biweekly stakeholder workshops, sprint reviews and quarterly roadmap sessions, aligning Sales, Customer Success, Engineering and Executive stakeholders around a single roadmap.

Product Manager, Chaitanya Design Pvt. Ltd.**Apr 2019 – May 2021****Outcome focus:** *Delivery throughput and client satisfaction across client engagements**Promoted from Mobile Application Developer (below) after leading feature scoping and client liaison on two launches; moved into full product ownership for all client engagements.*

- Managed end-to-end delivery of 15+ mobile and web application projects, delivering on time and within scope, and **contributing to a 20% increase in company profitability** over the role's tenure.
- Defined project timelines, resource-allocation plans, and delivery milestones, **improving product launch timelines by 15%** against the prior project baseline.
- Acted as primary liaison between clients and development teams, maintaining requirement clarity that supported high client satisfaction and repeat engagements.
- Conducted market and competitor research ahead of each engagement to inform positioning and feature prioritisation, improving post-launch user engagement.
- Mentored junior developers and designers on each project into a consistent cross-functional delivery rhythm (standups, sprint reviews, retros).

Mobile Application Developer, Chaitanya Design Pvt. Ltd.**Mar 2018 – Apr 2019****Outcome focus:** *Feature delivery and cross-functional alignment*

- Designed and built cross-platform mobile applications for clients across multiple industries, working directly with product, sales and marketing to align features with business objectives — this collaboration **contributed to a 15% increase in client sales**.
- Supported the full development lifecycle: planning, development, testing, release and post-launch support.
- Created and maintained technical documentation, ensuring knowledge continuity across handovers to the wider team.
- Built close working relationships with the product team that surfaced an aptitude for product strategy, leading directly to promotion into the Product Manager role above in April 2019.

EDUCATION**BSc (Hons) Computer Science and Software Engineering****Oct 2017 – Nov 2020**

University of Bedfordshire, UK

+2 High School**Jun 2015 – Jul 2017**
